

June 30, 2021

Dear Bronte Community,

We hope our students are enjoying the start of their summer holidays and getting some much needed relaxation in!

Tomorrow, July 1<sup>st</sup> is officially Canada Day, a national holiday celebrated across Canada. Ontario has also entered into Step 2 of the provincial reopening plan on June 30<sup>th</sup> now that 70% of adults have received one dose of the COVID-19 vaccine, and 20% are fully vaccinated.

### IN-PERSON LEARNING IN SEPTEMBER 2021!

We remain committed to keeping our Bronte community updated on everything happening on campus. Though the past year has required a lot of flexibility and adaptation to change, with things such as online learning, safety and health protocol updates, social distancing, and more, we are pleased to welcome our new students and returning students for in-person learning in September 2021!

### UPDATES ON TRAVEL INTO CANADA

Canada continues to lead the world in vaccine doses administered, with approximately 65% of the total population receiving at least one dose of the vaccine. Starting July 5<sup>th</sup>, the Canadian government will be introducing exemptions to quarantine and testing for fully vaccinated travellers who meet specific conditions.

 Math Award: **Yating**  
 Euclid Math Contest School Champion: **Saurav**  
 Science Award: **Thanh Liem**  
 Athletic Excellence: **Olufunsho**

**Special shout out to our Valedictorians, Amber and Konstantin!**

### RESIDENCE LIFE

Our residence students got together to welcome the summer holidays by taking it easy with some board games and card games. They got to watch some interesting movies and got moving during some intense games of badminton. Next month students in residence can expect weekly themed clubs such as: games day, talk time, sports day, sculpting lessons and cooking club as well as plenty of evening events!

As we enter into Step 2 of the provincial reopening plan, we encourage our students and families to remind themselves of the protocols put in place to ensure our campus remains a safe environment.
